

GENERAL INFORMATION

Title of Consultancy: MEL Framework Review – TI Indo-Pacific STRONGG

Application Closing Date: 28 October 2021

Consultancy Start and End Date: 1 November – 10 December 2021

Location of Consultancy: Remote

BACKGROUND

Transparency International (TI) is the global civil society organisation leading the fight against corruption. Through more than 100 chapters worldwide and an international secretariat in Berlin, Germany, TI raises awareness of the damaging effects of corruption and works with partners in government, business, and civil society to develop and implement effective measures to tackle it.

TI is currently implementing the Indo-Pacific Partnership for Strong, Transparent, Responsive & Open Networks for Good Governance (IPP STRONGG) 2020 – 2023. The project aims to contribute to reduced corruption in the region by empowering a strong and independent civil society voice and network that can mobilise action in support of increased accountability of public and private institutions nationally and regionally.

The TI IPP STRONGG Monitoring Evaluation and Learning (MEL) Framework was developed in 2020 during the first year of the programme, in parallel to the development of national project initiatives and at the same time as the creation of a baseline report. Targets were set in early 2021, and partners completed a first round of reporting.

The baseline report recommended that indicators be reviewed after the first year of use to test their applicability and given the development of the COVID-19 pandemic in 2020, such a review seems particularly appropriate.

The programme is now seeking follow up input and MEL expertise to adjust and further develop the framework itself as well as complementary tools or templates to facilitate its improved implementation.

OBJECTIVES

- Review the current programme indicators and targets set and recommend adjustments against those that have proved challenging in the first year of application.
- Recommend mechanisms to analyse progress against the programme objectives and apply a traffic light or similar system to the MEL Framework.
- Review programme reporting tools used currently and develop complementary tools and methods to regularly collect and capture relevant data aligned to the goals, outcomes and outputs of the project.
- Present framework and tools developed to partners.
