MAIN RECOMMENDATIONS

• The bidders' proposed experts should have previous experience in a similar research contract. Taken on board by the contracting authority (CA).

• The framework contract (FWC) should be structured in 2 lots: the first one dedicated to the creation of a single visual identity for all events and training sessions organised by different contractors, the second one to the development of contents and logistics of the events. By splitting the FWC into two lots, economies of scale can be obtained, while ensuring a consistent visual identity for the whole FWC. Not taken on board by the contracting authority.
